

# CANCER REGISTRY

## ENHANCE CANCER DATA ABSTRACTION AND ENSURE COMPLIANCE

We understand that millions of people are living with cancer and the accurate reporting of their condition, treatment, and care could potentially be used to save lives.

At the heart of a successful cancer program is the ability to meet or exceed industry standards for quality and compliance. Harmony Healthcare's Cancer Registry solution provides comprehensive assessments and abstracting at the highest level of specificity to ensure your limited time and resources are focused where they will deliver the greatest benefit, both to your patients and to your bottom line. Our solution will help you:

- Enhance data quality leading to improved operations and efficiencies
- Maintain full compliance with state reporting and accreditation
- Eliminate abstracting backlogs
- Provide timely, complete, and accurate registry abstracting services

Our solution includes expertise in the following areas:

- Commission on Cancer (CoC) program management / operational assessments
- New CoC program development and implementation
- CoC survey assessment and preparation
- Annual report writing, preparation of statistical analysis, and outcomes reporting
- Data quality and compliance audits
- Outsourced solutions with guaranteed accuracy and compliance
- Interim Data Oncology Directors
- Cancer registry staff training and education
- Proven oncology data abstracting and collection services for clinical trials, disease registries, and bone marrow transplant programs

Harmony's Cancer Registry solution delivers highly experienced and qualified Certified Tumor Registrars (CTRs) to provide you with the highest abstraction accuracy attainable.

Harmony Healthcare, a human capital management company, provides staffing and consulting solutions in Revenue Cycle Management and Population Health to a diverse range of healthcare organizations nationwide. The company's portfolio delivers quality solutions to empower healthcare organization success, enhance clinical and financial outcomes, and enable the transition to value-based healthcare.
