

REGISTRY SOLUTIONS

ENHANCE REGISTRY CLINICAL DATA AND CORE MEASURE ABSTRACTION

Registries have always played a critical role in the fight against disease. With population health management a priority in both the public and private sectors, registries are now an integral part of a healthcare facility's ability to provide outcomes data needed to negotiate with payers and protect revenue, as well as to provide compliant reporting that impacts state and federal allocation of grant funding.

As the popularity of registries rise, so do the complexities of the data required. And, as the number and types of clinical data registries continue to grow, the talent pool of qualified clinical registrars is rapidly shrinking. To thrive, health systems must either direct more staff time toward clinical data reporting or find innovative solutions for meeting their data management demands.

Harmony Healthcare's Registry Solutions provide quality registry abstraction and data management at the highest level of specificity in a variety of settings to enable hospitals, health systems and physicians to meet clinical performance measures and advance efforts to deliver evidence-based care.

Our solutions help you:

- **Reduce variability.** Case completeness, abstraction experience and data accuracy are no longer concerns.
- **Increase confidence.** Data is accurately and consistently captured by a dedicated team of registrars.
- **Improve efficiencies.** Lean processes allow each team to be staffed seamlessly.
- **Meet demand.** Registry case backlogs are eliminated and abstraction burden on internal staff is eased.
- **Maintain compliance.** More accurate data abstraction and submission ensure compliance with state reporting and accreditation.

QUALITY PROGRAMS

SIMPLIFYING THE PROCESS

Harmony's Registry Solutions deliver highly experienced and qualified registrars to provide you with the highest abstraction accuracy attainable. Our portfolio of services provides certified registrars for national, state and local registries and programs, including CoC (Commission on Cancer), Trauma, NCDR (National Cardiovascular Data Registry), NSQIP (National Surgical Quality Improvement Program), PQRS (Physician Quality Reporting System), NHSN (National Healthcare Safety Network), and others.

CANCER REGISTRY

- CoC program management and operational assessments
- New CoC program development and implementation
- CoC survey assessment and preparation
- Annual report writing, preparation of statistical analysis, and outcomes reporting
- Data quality and compliance audits
- Proven oncology data abstracting and collection of services for clinical trials, disease registries, and bone marrow transplant programs
- Cancer registry staff training and education
- Interim Data Oncology Directors

QUALITY PROGRAMS

- Get With The Guidelines: Stroke, Heart Failure, Resuscitation, AFIB
- American College of Surgeons: NSQIP, Bariatric Surgery (MBSAQIP), Children's Surgery (NSQIP Pediatric), Trauma Registry (TQUIP), Geriatric Surgery
- Bone Marrow
- Services include data abstraction and analyses, validation and reporting, performance improvement review and process development, verification / reverification or state designation assistance, PRQ preparation and submission, pre-survey consultation, ACS or state survey oversight, and education and training

With the largest team of registrars in the nation we have the flexibility and scalability to seamlessly staff each team with the skill set required for each unique registry. Whether you are looking to augment staff with interim consultants or are looking to lower costs and improve efficiencies through a fully managed outsourcing solution, Harmony Healthcare's scalable Registry Solutions provide robust support to keep your program running smoothly—allowing you to focus on providing quality patient care.

Our solutions assist you in establishing a new registry, addressing backlogs due to staff shortages and keep your registry current.

Harmony Healthcare, a human capital management company, provides staffing and consulting solutions in Revenue Cycle Management and Population Health to a diverse range of healthcare organizations nationwide. The company's portfolio delivers quality solutions to empower healthcare organization success, enhance clinical and financial outcomes, and enable the transition to value-based healthcare.
