

DENIALS INTELLIGENCE

AI-Powered Insights. Human-Driven Decisions.

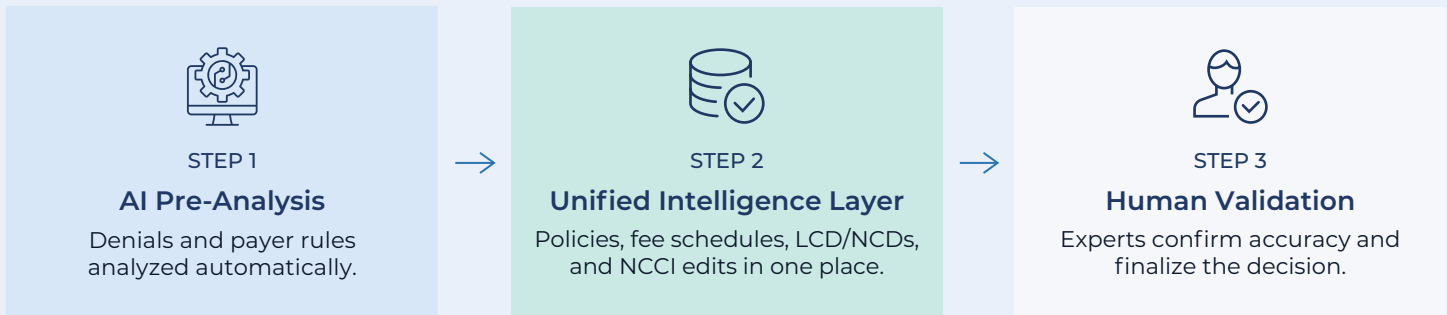

Denials are rising in volume and complexity.

Denials don't slow down because teams lack expertise. They slow down because critical information is scattered across systems.

Harmony Denials Intelligence centralizes payer policies, coding edits, and reimbursement guidance into a single workflow, helping teams resolve denials faster with greater consistency.

AI Does the Research. Experts Make the Decisions.

A unified workflow that turns research-heavy denial handling into a streamlined analyze-and-validate process.

What This Means for Your Team

- ✓ Faster denial resolution
- ✓ Greater consistency across teams
- ✓ Lower cost per denial
- ✓ Improved coding accuracy
- ✓ Higher productivity without added headcount

Better Together: AI + Expert Coders

Your team should be making decisions — not searching for answers.
