

# ONCOLOGY DATA INTELLIGENCE

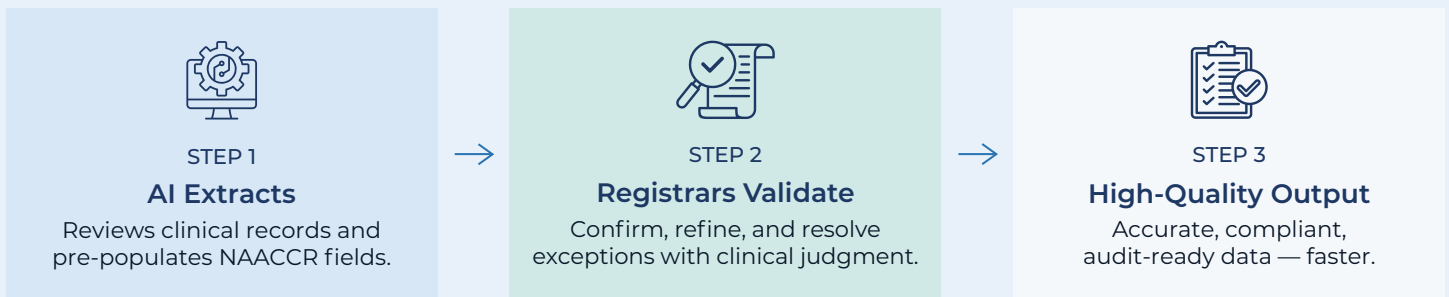

AI-Powered Abstraction. Human-Guided Precision.

**Growing caseloads. Evolving requirements. Increasing pressure for accuracy.**

Harmony Oncology Data Intelligence **changes that.** We combine AI-powered abstraction with expert registrar review to accelerate data collection while maintaining quality, compliance, and clinical oversight.

## AI Handles the Search. Registrars Apply the Expertise.

Before a registrar opens a chart, the heavy lifting is done — turning hours of manual abstraction into a streamlined review-and-validate workflow.

## Why It Matters

- ✓ Faster abstraction
- ✓ Greater than 90% accuracy
- ✓ Reduced manual review
- ✓ Improved consistency
- ✓ Expert oversight stays central
- ✓ Audit-ready from the start

## Platform Benefits

|  |   |  |  |
|--|---|--|--|
|  <p><b>Always Current</b><br/>Continuously updated NAACCR field library that reflects changing requirements.</p> |  <p><b>Organized for Registrars</b><br/>Data grouped by clinical context — demographics, staging, treatment, outcomes.</p> |  <p><b>Enterprise-Ready</b><br/>Built on Palantir Foundry with audit trails, governance, and secure access.</p> |  <p><b>Built for Compliance</b><br/>Aligned with CoC, SEER, and NPCR standards and built to evolve.</p> |
|--|---|--|--|

## Human Expertise. AI Acceleration.

Harmony Oncology Data Intelligence helps registrars spend less time gathering data and more time applying the expertise that drives quality outcomes.
